## The City of Hope Story

For nearly a century, City of Hope has been a model for scientific discovery and compassionate care for those facing cancer, diabetes and other life-threatening diseases. Among many breakthroughs, City of Hope's research has led to some of the most widely used cancer drugs and synthetic insulin used by millions with diabetes.

Today, our scientists and physicians continue to work to quickly translate promising laboratory discoveries into new treatments for patients who need them. As we approach our centennial in 2013, we are more confident than ever that we can accelerate the pace of scientific discovery for the benefit of patients worldwide.

We launched the Power of Hope \$1 billion fundraising campaign to ensure that we achieve our goals of discovery, and in doing so save even more lives.
