Dear doctor / genetic counselor:

Your patient learned of the Molecular Diagnostic Laboratory (MDL) at City of Hope National Medical Center while researching about a genetic condition for which s/he is at risk.

Your patient has provided you with the assay summary regarding the condition of interest and the test request form to be signed by a physician. The assay summary details the indications, methods, shipping and specimen requirements, and detection rate of testing. This information can also be found on our website (<http://mdl.cityofhope.org>).

With all samples, we require a completed test request form with a physician's signature, clinical information and family history information. We can bill to insurance. Please visit our website for more information (<http://mdl.cityofhope.org>).

If you have any questions or concerns, please feel free to call us at (888) 826-4362 or email us at mdl@coh.org.

Thank you,

Juan-Sebastian Saldivar, MD, FACMG
Director of Molecular Diagnostics

Wenqi Zeng, Ph.D., FACMG
Associate Director of Molecular Diagnostics

Vandana Sharma, MS
Genetic Counselor
