BE AWARE! How do I find reliable health information online?

RELIABLE:
Websites ending in .gov, .edu or .org
- gov: U.S. government agency (e.g., cancer.gov)
- edu: Educational institution (e.g., ucla.edu)
- org: Nonprofit organizations (e.g., CityofHope.org)

LESS RELIABLE:
- Blogs, Facebook posts or self-authored sites
- Research articles without citations
- Materials published more than 15 years ago
- Websites with little information
- .com identifies commercial websites

Reliable = credible, believable, trustworthy
