

CAREGIVER
GUIDELINES
TO THE
(NEW COVID-19
STANDARDS)

Should you get screened for COVID-19 if you will be caring for a loved one going through cancer treatment?

If you are a caregiver taking care of a loved one in cancer treatment at City of Hope and have questions about being screened for COVID-19, please call the City of Hope COVID-19 Hotline at **844-961-4673**. The hotline is staffed by highly trained City of Hope nurses.

Be sure to pick up the **Staying Well: Emotional Support for Older Adults During Covid-19** handout for more information at the Sheri & Les Biller Patient and Family Resource Center or Clinical Social Work office or you can find it online at [CityofHope.org/patienteducation](https://www.cityofhope.org/patienteducation)
